

EC 50 Semi Automatic

The Svegea EC 50 handles body size and large diameter tubular fabric. It is capable of cutting binding from 16 – 200 mm in width (5/8 – 8"). The standard machine cuts 3 bands simultaneously (4 with an additional knife unit).

The Svegea EC 50 incorporates our proven and very reliable crush cutting system. This system offers the fastest and most simple width adjustment of any machine available. It also guarantees very little maintainance cost.

An electronic foot control speed controller allows the operator to operate hands-free. The operator can place the foot controller in a position he or she finds most comfortable to operate the machine, this combination will ensure an optimal ergonomic working position for the operator.

Tension on the cut binding is infinitely variable, assuring the highest quality results.

With 50 years of experience in exclusively designing, manufacturing and installing collarettte band cutting machines, Svegea offers the most complete line of collarettte cutters, EC 50 economy machine, further enhances the Svegea family of collarettte cutters.

Machine specifications

- Cuts virtually all knitted fabric.
- Simple and precise measurement scales makes the machine easy to adjust and operate.
- Produces top quality – relaxed binding.
- Very low waste.
- Cutting knives of high-grade swedish steel.
- Limited working parts for very low maintenance.
- Economically priced.

Technical Data EC 50 Semi Automatic

Tubular Fabric width	27 cm - ∞ cm, (11" - ∞")
Band width	16 mm - 200 mm, (5/8" - 8")
Max no. of bands	3
Cutting capacity	Infinitely variable, 0 - 30 m/min, (0 - 33 yard/min)
Cutting system	Crush cutting

Motors

Power supply	230 V 50-60 Hz, single phase
Drive motor	3 phase asynchronous, 0, 18 kw
Speed control	Electronic

Machine dimensions

Machine weight	70 kg
Floor space	70 x 140 cm (28 – 55")
