

## Tube Sewing Unit 200

The Svegea Sewing unit 200 sews open fabric into a continuous tubular piece. This is the first stage required to produce Bias Binding. The unit is easy to use, requiring minimal operator assistance.

### The Sewing Process

- Open with fabric (up to 200cm/78") passes through a folder.
- Folded edges are automatically aligned, prior to seaming.
- Excess fabric is trimmed away during sewing.
- An in line heated iron, irons the sewn seam.
- The fabric is re-rolled.

## Machine specifications

- Preset stitch counter (for lock stitch, to eliminate the risk of bobbin thread running out).
- Thread break detector.
- Vacuum unit to remove excess trimmed material.
- Electronic machine speed regulator.
- Automatic photo cell edge alignment.
- Variable stitch length.

## Technical Data Tube Sewing Unit 200

Sewing head	Lockstitch*
Maximum open width	2000 mm (78")**
Maximum roll diameter	400 mm (16")
<b>Power</b>	230 V, single phase, 50/60 cycles
Air supply	6 bar
<b>Machine dimensions</b>	
Floor space	380 x 165 cm (12,5 x 5,5 ft)
Net weight	400 kg (880 lbs)
