

FESTOONER

The Svegea FESTOONER, designed and manufactured by Svegea of Sweden, allows cut collarete binding to be bulk accumulated into boxes or containers. The Svegea FESTOONER is compatible with all Svegea upright collarete cutters.

FESTOONING allows the SVEGEA Collarete cutters to be left unattended as it produces accurately cut collarete binding. Additionally, production is greatly enhanced at the sewing operation by eliminating the need to stop for roll changing. Material can be fed from the box all day. No re-threading at the start of a new roll is necessary.

FESTOONER

The Svegea FESTOONER continous feed system saves time and waste. Transportation of binding is also easier and more cost effective. The handling of the bias bands in boxes is very practical.

The Svegea FESTOONER is available for up to 4 bands. The FESTOONER offers these features:

- Economically priced.
- Simple to install.
- Low operating costs - moderate consumption of compressed air.
- Compatible with all Svegea upright Collarete Cutters.
- A time money saver from the moment it is turned on.

Data/Dimensions:
